

DoNuTS Technical Meeting

Time: 1600 Wednesday, 10 September 2008

Place: NE Conference Room, 1106 Etcheverry

Speaker: Ross Marrs, Lawrence Livermore National Laboratory

Subject: Post-Detonation Nuclear Forensics

Following a terrorist nuclear detonation in an American city or elsewhere, forensic information will be needed immediately for attribution and the prevention of other detonations. We are developing novel day-one forensic techniques, including gamma-ray measurements of the fireball and debris cloud.
